LETTER OF RECOMMENDATION

Mr. Febin Jose has asked me to write a letter of recommendation to accompany his application for his Master's program. I am very pleased to do so. I have known him for the past three years as an under graduate student at St. Stephen's College. I have been teaching him for the last five semesters and I would like to stress particularly his thirst for knowledge which is intensified by his strong determination, and his deep interest in Computer Science.

Febin is quite simply an outstanding student. His overall performance shows a unique creativity and responsible attitude toward his education. I have always found him to be a creative problem-solver who is very interactive in class and endorses discussion with cogency and natural ease. He displays impressive logical thinking abilities and an intellectual curiosity beyond that of his peers. I have observed that he has a constant desire to learn more and strive for perfection. He is very easy-going and polite, and although he is very serious and motivated in his pursuit of knowledge, he is also very humble and willing to listen to others ideas. He has maintained an excellent academic record in subjects of Computer Science throughout the past five semesters. The only fault I have encountered in him is his retiring nature. His modesty sometimes hides a young man of remarkable strength and broad interests.

Febin's deep understanding of the subject as well as his quest for knowledge has constantly impressed me. Besides college, he has been involved in certification courses and workshops in Core and Advanced Python, Ethical Hacking and Web Development. He has also completed a Security Auditing project for the college. He completed the project without any professional help which demonstrated his deep interest and understanding in the field of Cyber Security. This project has helped the college in strengthening its cyber security to a great extent.

I believe in Febin's outstanding abilities in Computer Science and strongly recommend him for further education at your University, where he can develop and apply his bright talents.

Yours Sincerely,

Sseclhi 25.1.18
